

HOT STAMPING MACHINE DT ECO

DT ECO is an efficient and effective machine designed for the coating of embossed license plates, using hot stamping technology.

It enables simultaneous coating of two single-row number plates as well as any other kind of number plate existing on the market. New technical solutions implemented in this machine reduce its power consumption.

BASIC PARAMETERS:

- max. capacity: 850 plates per hour,
- max. foiling width: 235 mm,
- speed controller,
- foil tension control,
- drum overheating protection,
- small footprint,
- power supply: ~230 V/50 Hz,
- average power consumption 1,0 kW
(maximum power consumption 2 kW)
- the machine is equipped with the temperature regulator and it provides the possibility of the hot-stamping foil application in the temperature recommended by the hot-stamping foil manufacturers: 170 – 225 °C.
